

COVER LETTER

As a graduate student at Arizona State University pursuing my master's in computer engineering with a focus on the CS track, I am confident in my ability to contribute as a software engineer at Tesla. The opportunity to work on projects that benefit individuals and professionals both in the United States and globally is incredibly appealing to me. Working alongside trained professionals at Tesla, who are among the best in the industry, would be an exciting opportunity. Throughout my coursework and professional experiences, I have gained experience with various technologies, including MATLAB, Machine Learning, Data Analytics, and Android development. I am confident that my interests and passion for software development align with Tesla's mission and I believe I would make a valuable addition to the team. I am eager to join such a groundbreaking organization and contribute my skills to Tesla's continued success. I am confident that my skills, passion, and interest align perfectly with the work done at Tesla, and I am excited about the opportunity to be a part of this dynamic and innovative team.
